

**PROFILING
MACHINE
FOR ALL TYPES
OF OBOES**

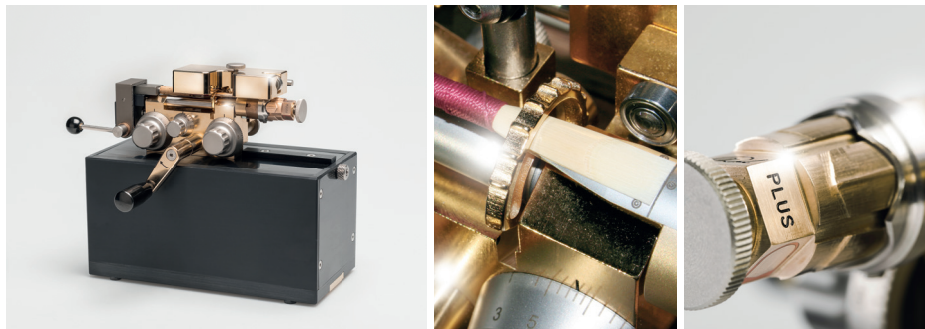

www.oboenrohr.ch

Precise scraping of highest quality, consistent reproduction with little time necessary. Simple, user-friendly operation: A mature product of years of development.

*Stressfree
reedmaking!*

 10 YEARS
BUCHER

After a simple change of the template you can scrape the reeds for oboe, cor anglais, oboe d'amore, baritone oboe, baroque, classical and Vienna-oboe as well as reeds with American scrape.

- Scraping at highest precision, not attainable by hand
- No hand corrections necessary
- Correction possibilities for all parts of the scrape
- Consistent reproduction of the desired scrape
- Time-saving and easy to operate

The thickness is variable in hundredths of millimetres and the length of the scrape is also adjustable. We offer standard templates, also **personal templates, crafted individually according to your reed.** They include five segments for original and correction scrape. More than 500 reeds can be scraped with the round knife. The knife replacement doesn't require calibration.

Further Bucher products:
Tip profiling machine for bassoon reeds
Automatic units for both machines
